

Empowering People to Win in Life & Travel

Mission Statement

We believe every individual is destined for greatness. 'We Will Win' is a movement rooted in faith, freedom, and fulfillment—empowering people to live their God-given purpose through travel and wealth creation.

A TRAVORIUM WEALTH-BUILDING ANALYSIS

Two Paths to \$9,000–\$11,000 a Month

Travorium Ambassador Residual Income vs. Traditional Capital Investing

Empowering People to Win in Life & Travel

THE TARGET

Both Paths Are Solving for the Same Number

Empowering People to Win in Life & Travel

Every comparison in this report is measured against one goal: consistent, positive monthly cash flow of \$9,000–\$11,000 — money that shows up whether or not you work that day.

MONTHLY TARGET

\$9,000–\$11,000

residual / passive cash flow, per month

ANNUALIZED

\$108,000–\$132,000

a six-figure income, replicated every year

This report compares two ways to engineer that number — by whom you know and help, or by how much you already own.

PATH A — Travorium Ambassador

Built through 376 referrals across a leveraged network

PATH B — Traditional Investing

Built through accumulated personal capital and market yield

PATH A

The Travorium Ambassador Route

Empowering People to Win in Life & Travel

Ambassador is the top position in the Travorium compensation plan. Income is residual — it is paid on the ongoing activity of a network you helped build, not on hours you personally work that week.

376

Total referrals across the network that support one Ambassador position

~25

One-Star Directors — the base layer of the team

~8

Two-Star Directors — leaders who emerge from that base

4–5

Three-/Four-Star Directors — senior leadership tier

AMBASSADOR RESIDUAL

\$9,000–\$11,000

per month, positive cash flow

\$370

personal capital required to start

24–36

months — typical build timeline to Ambassador

Figures reflect the Travorium published compensation plan and We Will Win Team field results. Individual results vary with effort and team activity.

The Traditional Investing Route

To replace \$9,000–\$11,000 a month with investment income alone, you need enough principal that a conservative annual yield throws off that cash without touching the balance. The lower the yield, the more capital it takes.

Annual Yield	Typical Source	Capital Needed for \$9,000/mo	Capital Needed for \$11,000/mo
3%	High-grade bonds / CDs	\$3,600,000	\$4,400,000
4%	Diversified dividend portfolio	\$2,700,000	\$3,300,000
5%	REITs / balanced income fund	\$2,160,000	\$2,640,000
6%	Higher-yield real estate	\$1,800,000	\$2,200,000

A withdrawal-rate lens: even at a 4% “safe withdrawal rate,” the number below is what a retirement-style nest egg would need to reach before it could fund this target without depleting.

Working range used in this report: **\$1.8M – \$3.3M in invested capital** to generate \$9,000–\$11,000/month across a 3%–6% yield band.

How Long Each Route Actually Takes

Years required to accumulate \$2.16M (the 5%-yield target for \$9,000/mo) by saving and investing at 7% average annual return — compared to the typical 24–36 month build to Ambassador.

Side-by-Side Comparison

Empowering People to Win in Life & Travel

	Travorium Ambassador	Traditional Investing	TSA Officer (Linear Income)
Capital required to start	\$0 – modest working capital	\$1.8M – \$3.3M in savings/investments	\$0 — but the job itself is the price
What you're building	A network of 376 referrals across the team	An investment portfolio or property	Hours on a schedule — nothing that outlives the shift
Primary effort	Relationship-building, mentoring, teaching duplication	Saving discipline, market research, patience	Mandatory overtime stacked on a full-time shift
Typical time to target	24 – 36 months	20 – 40+ years at typical savings rates	120–140 hrs/week, every week, to hit the number
Ongoing effort once there	Lead and support an active team	Monitor/rebalance a portfolio	Same hours forever — no residual, ever
Income once target is hit	\$9,000–\$11,000/month, residual	\$9,000–\$11,000/month, from yield	\$122,000–\$140,000/year (2025), fully linear
Primary risk	Team engagement and activity levels	Market volatility, interest-rate and yield risk	Burnout, injury, forced OT — income stops the moment you do

Empowering People to Win in Life & Travel

THE HOURS NOBODY TALKS ABOUT

What \$9,000–\$11,000 a Month Actually Costs in Time

A dollar figure alone hides the real price. Here is what each path actually costs in hours — using a real 2025 case: a TSA officer working regular hours plus mandatory overtime, all in one job.

LINEAR INCOME — TSA OFFICER

120–140 hrs/week

to earn \$122,000–\$140,000/year — effective rate ≈ \$19/hour

RESIDUAL INCOME — TRAVORIUM AMBASSADOR

5–10 hrs/week

to maintain \$9,000–\$11,000/month once built — effective rate \$250+/hour

Same target income. One path trades away your whole week to get there. The other trades 24–36 months of part-time effort, then hands the hours back.

BUILD PHASE — Travorium Ambassador

10–15 hrs/week while the 376-referral network compounds

FOR COMPARISON — Traditional Investing

Near-zero hours once built — but decades of saving come first

WHY THE GAP CLOSES FASTER

Built on the Five Wealth Principles

376 referrals isn't luck — it's the same five disciplines that compound capital, applied to relationships instead of dollars.

1

Persistency

Staying in the game long enough for referrals to compound into leadership tiers

2

Consistency

Daily, repeatable actions — the same habits that grow a portfolio grow a network

3

Discipline

Following the system instead of chasing shortcuts, deal after deal, month after month

4

Urgency

Acting now, while the network effect is still compounding, not waiting for the perfect moment

5

Excitement

Bringing energy that makes the opportunity contagious — and duplicatable

Empowering People to Win in Life & Travel

THE BOTTOM LINE

Same Destination. Very Different Runway.

One path asks for **\$1.8M–\$3.3M** in capital most people spend decades accumulating. The other asks for **376 referrals**, built with people, over 24–36 months — to reach the same \$9,000–\$11,000 a month.

Both are real wealth-building strategies. This report exists so you can choose yours with the full picture in front of you.
